

Week of 2026-12-28–2027-01-03

Saved fictional demo

edited-literal-duplicates.json

4 scheduled visits · 1 kept off this week

Saved planning suggestions; original checks have not been rerun. The saved source is labeled mock. Venues are fictional and affinities are hand-set.

Dates are planning choices, not reservations or verified availability. Food and accessibility checks are heuristics over tags and keywords, not medical or dietary advice. Confirm needs and current details with the venue and care team.

Visit-only venue questions and caregiver reply notes are not stored in the saved-week v1 file and are not included here.

Saved source and requested inputs

Original received timestamp	2026-10-08T17:16:07.772Z
Saved-copy timestamp	2026-10-08T12:00:00.000Z
City	Pasadena

These timestamps are copied from the saved file. They are not a new venue check, a report-generation time, or proof of source authenticity.

Kept off this week

<script>window.REPORT_INJECTED=true</script> & café 老朋友
second line

Restaurant · Original suggestion: Wednesday · Occurrence pick-1

Original Qloo ID FIX-P-11

Original affinity 0.82

<script>window.REPORT_INJECTED=true</script> & café 老朋友
second line

Original plan notes

- <script>window.REPORT_INJECTED=true</script> & café 老朋友
second line

Original rejected candidates

These reasons belong to the original response. They have not been reevaluated.

Salumeria Roma

- soft_foods · fail: menu signals are mostly firm: crusty bread, cured meats

This read-only handoff preserves the arranged suggestions and displayed source details. Keep the original JSON to reopen or rearrange the week in TasteTable and inspect its complete comparison and tool trace. Rendering this HTML does not change that file.
