

Saved visit record

original-record.json

Week starting 2024-02-26 · 3 original occurrences

Saved fictional demo

The original file labels its source mock. Its venue suggestions are demo data; this report does not verify visits.

Planned dates and recorded visits are separate. An unrecorded outcome does not mean a visit did or did not happen. An omitted plan can still have a recorded outcome.

Dates, outcomes and notes below are saved entries, not verified observations or new recommendations.
