

Saved visit record

literal-notes-世界.json

Week starting 2024-02-26 · 3 original occurrences

Saved live-source label

The original file labels its source live. This report does not authenticate that label or refresh provider data.

Planned dates and recorded visits are separate. An unrecorded outcome does not mean a visit did or did not happen. An omitted plan can still have a recorded outcome.

Dates, outcomes and notes below are saved entries, not verified observations or new recommendations.

Saved provenance
